 $\mathbf{A}_k \in \mathrm{W}^{1,\infty}(\Omega;\mathrm{M}_r(\mathbf{R}))$ ,  $k \in 1..d$ , and  $\mathbf{C} \in \mathrm{L}^\infty(\Omega;\mathrm{M}_r(\mathbf{R}))$  satisfying

(F1) matrix functions 
$$\mathbf{A}_k$$
 are symmetric:  $\mathbf{A}_k = \mathbf{A}_k^{ op}$ ;

(F2) 
$$(\exists \mu_0 > 0)$$
  $\mathbf{C} + \mathbf{C}^\top + \sum_{k=1}^d \partial_k \mathbf{A}_k \ge 2\mu_0 \mathbf{I}$  (ae on  $\Omega$ ).

Operator  $\mathcal{L}: \mathrm{L}^2(\Omega; \mathbf{R}^r) \longrightarrow \mathcal{D}'(\Omega; \mathbf{R}^r)$ 

$$\mathcal{L}\mathsf{u} := \sum_{k=1}^d \partial_k(\mathbf{A}_k\mathsf{u}) + \mathbf{C}\mathsf{u}$$

is called the symmetric positive operator or the Friedrichs operator, and

$$\mathcal{L} \mathsf{u} = \mathsf{f}$$

the symmetric positive system or the Friedrichs system.

#### Boundary conditions and the trace operator

Weak solution of a Friedrichs system belongs only to the graph space

$$W := \left\{ \mathsf{u} \in \mathrm{L}^2(\Omega; \mathbf{R}^r) : \mathcal{L}\mathsf{u} \in \mathrm{L}^2(\Omega; \mathbf{R}^r) \right\},\,$$

which is a Hilbert space with  $\langle \cdot | \cdot \rangle_{L^2(\Omega; \mathbf{R}^r)} + \langle \mathcal{L} \cdot | \mathcal{L} \cdot \rangle_{L^2(\Omega; \mathbf{R}^r)}$ .

### Boundary conditions and the trace operator

Weak solution of a Friedrichs system belongs only to the graph space

$$W := \left\{ \mathsf{u} \in \mathrm{L}^2(\Omega; \mathbf{R}^r) : \mathcal{L}\mathsf{u} \in \mathrm{L}^2(\Omega; \mathbf{R}^r) \right\},\,$$

which is a Hilbert space with  $\langle \cdot | \cdot \rangle_{L^2(\Omega; \mathbf{R}^r)} + \langle \mathcal{L} \cdot | \mathcal{L} \cdot \rangle_{L^2(\Omega; \mathbf{R}^r)}.$ Boundary field

$$\mathbf{A}_{\boldsymbol{\nu}} := \sum_{k=1}^{d} \nu_k \mathbf{A}_k \in \mathcal{L}^{\infty}(\partial\Omega; \mathcal{M}_r(\mathbf{R})),$$

where  $\boldsymbol{\nu} = (\nu_1, \nu_2, \cdots, \nu_d)$  is the outward unit normal on  $\partial \Omega$ .

Classical theory Abstract theory Examples

#### Assumptions

L - a real Hilbert space ( $L' \equiv L$ ),  $\mathcal{D} \subseteq L$  a dense subspace, and  $\mathcal{L}, \tilde{\mathcal{L}} : \mathcal{D} \longrightarrow L$  linear unbounded operators satisfying

(T1) 
$$(\forall \varphi, \psi \in \mathcal{D}) \quad \langle \mathcal{L}\varphi \mid \psi \rangle_L = \langle \varphi \mid \tilde{\mathcal{L}}\psi \rangle_L;$$

(T2) 
$$(\exists c > 0) (\forall \varphi \in \mathcal{D}) \quad \|(\mathcal{L} + \tilde{\mathcal{L}})\varphi\|_L \le c \|\varphi\|_L;$$

(T3) 
$$(\exists \mu_0 > 0) (\forall \varphi \in \mathcal{D}) \quad \langle (\mathcal{L} + \tilde{\mathcal{L}}) \varphi \mid \varphi \rangle_L \ge 2\mu_0 \|\varphi\|_L^2.$$

4 E 6 4 E 6

Classical theory Abstract theory Examples

### An example: The classical Friedrichs operator

Let  $\mathcal{D} := \mathrm{C}^{\infty}_{c}(\Omega; \mathbf{R}^{r})$ ,  $L = \mathrm{L}^{2}(\Omega; \mathbf{R}^{r})$  and  $\mathcal{L}, \tilde{\mathcal{L}} : \mathcal{D} \longrightarrow L$  be defined by

$$\begin{split} \mathcal{L}\mathbf{u} &:= \sum_{k=1}^{d} \partial_k(\mathbf{A}_k \mathbf{u}) + \mathbf{C}\mathbf{u} \,, \\ \tilde{\mathcal{L}}\mathbf{u} &:= -\sum_{k=1}^{d} \partial_k(\mathbf{A}_k^\top \mathbf{u}) + (\mathbf{C}^\top + \sum_{k=1}^{d} \partial_k \mathbf{A}_k^\top)\mathbf{u} \,, \end{split}$$

where  $A_k$  and C are as before (they satisfy (F1)–(F2)).

Then  $\mathcal{L}$  and  $\tilde{\mathcal{L}}$  satisfy (T1)–(T3)

### Well-posedness theorem

#### Theorem

Under assumptions (T1)–(T3) and (V1)–(V2), the operators  $\mathcal{L}_{|_{V}}: V \longrightarrow L$  and  $\tilde{\mathcal{L}}_{|_{\tilde{V}}}: \tilde{V} \longrightarrow L$  are isomorphisms.

#### Theorem

**(Banach–Nečas–Babuška)** Let V and L be two Banach paces, L' dual of L and  $\mathcal{L} \in \mathcal{L}(V; L)$ . Then the following statements are equivalent: a)  $\mathcal{L}$  is a bijection; b) It holds:

$$\begin{aligned} (\exists \, \alpha > 0)(\forall \, u \in V) & \|\mathcal{L}u\|_L \ge \alpha \|u\|_V \,; \\ (\forall \, v \in L') & \left( (\forall \, u \in V) \quad {}_{L'}\!\langle \, v, \mathcal{L}u \,\rangle_L = 0 \right) \implies v = 0 \,. \end{aligned}$$
